START HERE

Steve Jurczyk, NASA Associate Administrator — We Need More Space

Host, producer and editor · English · [Polish transcript](#)

What I did: Prepared, recorded and edited an interview with NASA's highest-ranking civil servant about missions to the Moon, Mars, Europa and Titan, under tight time and location constraints.

Shows: Interviewing top executives in English under pressure, the kind of guest a flagship corporate podcast features.

1 · PODCAST PRODUCTION AND STAKEHOLDER COORDINATION

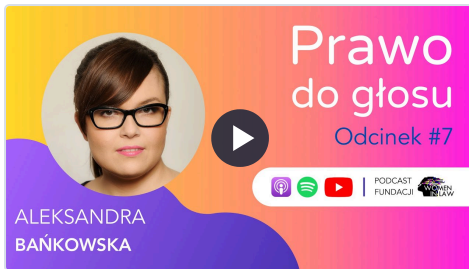

AI in a Lawyer's Work — "Suplement Aplikacji Adwokackiej"

Warsaw Bar Council · 4-person panel, part 1 of 2 · Polish

What I did: Recorded and edited a four-person discussion, then coordinated authorisations and consents from every participant before publishing.

Shows: AI as a topic, multi-guest audio production, approval workflows, and an internal communication channel for the Bar's trainee advocates.

Interview with a PwC Legal Partner — “Prawo do Głosu”

Women in Law Foundation · Guest: Aleksandra Bańkowska, Partner at PwC Legal · Polish

What I did: Produced the episode end to end, including multiple rounds of approvals, consents and edits with the guest and her firm.

Shows: Working within a global professional services firm’s approval process, which is exactly the rhythm of a corporate podcast.

SpaceXYZ, Episode 81 — live monthly podcast

Co-host and producer · 2 hours, streamed live on YouTube · Polish

What I did: Co-host a monthly live show on the top space news, with real-time audience Q&A. This episode covers the Roman Space Telescope launch and the top space news of August 2026.

Shows: Publishing discipline (81 episodes on a fixed schedule since 2021) and composure on live, unedited broadcasts.

2 · EXPLAINING COMPLEX TECHNOLOGY

Why is the Epic Crown 2 project so important?

EU-funded research consortium · English · Madrid & Lyon

What I did: Filmed interviews at a consortium conference in Madrid and in the laboratories of Fabentech in Lyon, France. Created custom animations explaining how antibodies work, based on graphic materials supplied by an external contractor.

Shows: International, multi-location production with a French partner, collaboration with an external vendor, and translating cutting-edge science for a broad audience.

Titan: a space robot for special missions — PIAP Space

Delivered for the European Space Agency · Polish with English subtitles

What I did: Filmed a full production day at PIAP Space in Warsaw and condensed tens of gigabytes of footage into a video under 5 minutes about a robotic arm for servicing and capturing satellites.

Shows: Making robotics and automation engineering clear and engaging, and editing long raw material into a short, focused story.

MORE WORK

- Interview with Sławosz Uznański-Wiśniewski, Polish ESA astronaut — We Need More Space: prestigious guest, recorded under strong time and location pressure. [Watch](#)
- “Zawód: Prawniczka” with Hanna Gronkiewicz-Waltz, former Mayor of Warsaw — client podcast. [Watch](#)
